

Meeting 2

Reading IT Articles

Understanding and analyzing
texts about Information
Technology

Why Read IT Articles?

- Improve technical vocabulary and reading skills
- Stay updated with the latest technology trends
- Understand real-world applications of IT concepts
- Prepare for academic and professional communication in IT

Typical Structure of an IT Article

1. Title – Summarizes the topic (e.g., 'The Future of Cloud Computing')
2. Introduction – Introduces the issue or technology
3. Main Body – Provides explanation, examples, and data
4. Conclusion – Summarizes findings or perspectives
5. References – Sources or further reading

Example Reading: Cloud Computing

- Excerpt:
- “Cloud computing has transformed the way businesses operate by providing flexible and scalable access to computing resources. Organizations now use cloud services to reduce infrastructure costs and increase efficiency.”
- Task:
 - - Identify the main idea
 - - Find and list 3 technical terms
 - - Translate the paragraph into Indonesian

Vocabulary in Context

- Transformed – Changed completely
- Flexible – Easily adapted to different conditions
- Scalable – Can be expanded to handle increased demand
- Infrastructure – Physical and organizational structures
- Efficiency – Achieving maximum productivity with minimum waste
