

Meeting 3

Writing: Simple System Description

Describing basic IT systems and applications in English

Why Write System Descriptions?

- Communicate technical details clearly to users and stakeholders
- Document features and functions of a system
- Practice structuring information in English
- Useful for manuals, proposals, and academic reports

Structure of a Simple System Description

1. System Name
2. Purpose – What is the system for?
3. Main Features – What does it do?
4. Users – Who uses it?
5. Technologies – What tools are used to build it?

Example: Library Management System

- System Name: Library Management System
- Purpose: To help librarians manage book lending and returns.
- Features: User registration, book search, loan tracking.
- Users: Librarians, Students, Admins.
- Technologies: PHP, MySQL, HTML/CSS
