Writing: Mini Project Report

How to write a simple report for an
IT-related mini project

Why Write a Mini Project Report?

- To document project work and results
- To communicate process and findings
- Useful for assignments, internships, or portfolios
- Demonstrates ability to organize technical content

Basic Report Structure

1. Title Page – Project title, name, institution, date
2. Introduction – Objective and background
3. Methodology – Tools and steps taken
4. Results – Outputs, screenshots, or findings
5. Conclusion – Summary and suggestions
6. References – (if needed)

Sample Mini Project Report (Excerpt)

- Title: Attendance App with QR Code
- Introduction:
 - This mini project aims to develop a mobile attendance app using QR code scanning.
- Methodology:
 - We used Flutter for the front end and Firebase for the backend. Users scan QR codes to mark attendance.

Sample Mini Project Report (Excerpt)

- Results:
 - The app was tested with 10 students and successfully recorded attendance in real-time.
- Conclusion:
 - The system works well and can be expanded for classroom use.
